# '70 1/2 CAMARO Z28® FULL BUMPER

A1155-200

## IMPORTANT

Before you begin to assemble your model kit, study the instructions carefully. This will help you to familiarize yourself with the part locations as you proceed. Prior to cementing parts together, be sure to "TEST FIT" them in order to assure proper alignment and also to check for excess "FLASH" that may occur along parting lines. Use a sharp hobby knife or file to remove flash if necessary. If you wish to paint your model, various sub-assemblies and components should be painted before any parts are attached. During assembly, you may note that the recommended color is stated after the part name. This model kit is molded from the finest high-impact styrene plastic. Use only paints and cements which are specifically formulated for styrene. Because the cement will only adhere to bare plastic, it is necessary to remove any paint or "plating" from the area to which the cement is to be applied.

## TOOLS

### HOBBY KNIFE

Use a sharp hobby knife to remove parts from the trees. Some parts may appear to have an extra "tab" on them, these should be removed.

### TWEEZERS

Tweezers are handy for holding very small parts during assembly or painting.

### CEMENT

We recommend the use of liquid polystyrene cement. Apply with a fine brush or toothpick. Use cement sparingly or a sloppy job will result.

## PAINT COLORS

[A] Black	[I] Steel	[Q] Yellow	[Y] Dark Green
